EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In the Abstract:

last line, the words "Fig. 4" have been deleted.

2. The following is an examiner's statement of reasons for allowance: regarding independent claims 1 and 9, it is believed that the prior art of figure 2 as admitted by applicant is the most closest prior art with respect to the claimed invention. More specifically, the prior art of figure 2 discloses an adjustable multi-band antenna having a ground plane 210, a radiating plane 220 with a dielectric support part 280, a feed conductor 212 and a short conductor 211 of the antenna, and an adjusting circuit to displace operation band of the antenna, which adjusting circuit comprises a parasitic element 230 and a switch SW as well as a terminal element X directly connected to the ground plane, by which switch the parasitic element can be connected to the terminal element. See also the present specification, page 3 lines 3-30. The prior art of figure 2, however, fails to disclose or render obvious that the adjusting circuit further comprising, for restricting the effect of controlling the switch to a single operation band of the

antenna, a filter located electrically in series with the parasitic element and the switch as specified in the claims.

None of other cited prior art, alone or in combination, cures the above deficiencies in the prior art of figure 2.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Nguyen T. Vo whose telephone number is (571) 272-7901. The examiner can normally be reached on Monday-Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Edward Urban can be reached on (571)272-7899. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
